# the Vision Fitness Difference

Whether your vision is a slimmer body, a healthier heart, stress management, or if you simply enjoy exercise, Vision Fitness has the elliptical trainer to help you achieve your goals.

Vision Fitness began as a division of the Trek® Bicycle Company, where we pioneered the development of the smoothest, quietest, and most comfortable fitness bikes available. In 1996, Vision Fitness was spun off by the Trek® Fitness management team to continue to bring to market innovative fitness products. We offer you the same combination of quality, value, and performance that has made our founding company the most requested bicycle brand in America.

VISION FITNESS headquarters located in Lake Mills, WI

In May 2006, we celebrated our 10-year anniversary. Over the last 10-plus years, we have grown from offering three fitness bikes to a full lineup of award-winning treadmills, elliptical trainers, fitness bikes, and strength equipment. As you can see in the timeline below, we quickly became one of the top fitness equipment companies in the world. We attribute our success to our dedication to high quality standards and developing innovative products that motivate people to achieve their goals. It all starts with a Vision ...

To learn more about Vision Fitness and our complete line of quality fitness products, please visit our website: [www.visionfitness.com](http://www.visionfitness.com).

Vision Fitness prides itself in creating high-quality fitness products at an exceptional value that best help you achieve your fitness goals. Vision Fitness® products have earned numerous "Best Buy" awards since 1995. Below is a list of these award-winning products:

Check out these great reviews:

ALL YOU, APRIL 2005  
**X6100**

"SPACE SAVER The Vision Fitness **X6100** has seven feedback windows—so you don't have to switch between displays—five programs, heart-rate sensors and 16 resistance levels. Fold up the arms when you're done to save space."

LA TIMES, DECEMBER 2005  
**X6200HRT**

"[The Vision **X6200HRT** is a] full-featured model that folds up. Fits in a closet when not in use; foot pedals and rails lift to vertical position in seconds, reducing 7-foot length by half. Large dot-matrix screen. Sprint 8 interval program delivers a fun, challenging workout in 20 minutes..."

HEALTH, JANUARY 2005  
"BEST OF FITNESS AWARD WINNER"  
**X6100**

"This elliptical trainer is made of heavy-gauge steel and folds to less than 4 feet long, making it a nice fit for nearly any room. The simple-to-decipher console offers five program options, in addition to displaying workout time, distance, calories burned, and three other types of workout feedback. The **X6100** also has hand grips that detect your heart rate on contact and a reading rack in case you need a distraction."

Try an award-winning Vision Fitness® elliptical trainer at your local specialty fitness retailer. We are confident you will agree with the thousands of satisfied users and find our ellipticals are the smoothest and quietest you have ever used. You will also enjoy the fact that our elliptical trainers save space in your home by either coming in a compact size or offering our patented folding feature.

# smooth

The goal at Vision Fitness was to develop the most comfortable elliptical motion possible. To accomplish this, we offer long pedal arms and pivoting footplates for a natural and fluid

stride motion. Our dual-action arms are designed to keep you in a proper upright position and provide smooth upper-body movements. The large and roomy footplates with cushioned pads found on the *X6200HRT* and *X6700HRT* models ensure an extra-comfortable workout. All of these features, combined with our long and natural stride length, make our elliptical trainers more comfortable than competitively-priced cross-trainers.

Vision Fitness pioneered the friction-free magnetic resistance

system with no wearing parts for maximum performance and durability. Combine this system with our optimally-weighted flywheel, and you get the smoothest resistance mechanism available. When the resistance level is changed on the console (even in the middle of a workout), the transitions are smooth, gradual, and fluid. Vision Fitness is so confident in this system that we offer a Lifetime warranty for home use on the magnetic brake/generator on all of our models.

compact

quiet

smooth

# quiet

Many people read a magazine or watch television while working out on a piece of home fitness equipment. Additionally, they may work out in the early morning or late evening and do not want to disturb others. Vision Fitness is aware of this and, therefore, developed our Quiet-Glide™ drive technology, which utilizes a multi-ribbed supersilent Poly-V belt, to ensure an extra-quiet workout. The large 10-ribbed Poly-V belts on our elliptical trainers give our products an advantage over competitors who use cogged or smaller belts. The larger surface area puts less tension on the

Quiet-Glide™  
drive system

belt, which results in a longer lifespan of not only the belt but the entire drive system. Computer modeling on this drive system shows the expected life to exceed 20,000 hours—that's over 50 years of life when used one hour a day!

International Organization for Standardization (ISO) certification is attained by implementing and demonstrating the consistent manufacturing procedures that are necessary to produce a top quality product. All Vision Fitness® elliptical trainers are produced in plants that are ISO-certified.

Oftentimes, the size of a person's home or workout space prevents them from purchasing a large piece of cardio equipment. Our patented folding system allows us to use extra-long pedal arms for

smooth motion, with the added benefit of being easily folded out of the way. The pedal arms and guide rails conveniently lock together in an upright position when you want to use the room for other activities.

For those of you interested in a smaller, more affordable piece of equipment, we've developed our compact **X1400** model. This model is loaded with lots of

comfortable, quality features in a small 57"L x 26"W footprint and includes a long 18-inch stride length.

When incorporating space-saving features into our elliptical trainers, we made sure to address ergonomics. All of our home ellipticals have small three-inch Q-Factors (the distance between your feet), which promotes a natural stance and helps reduce joint fatigue during longer exercise sessions. The position of our dual-action arms reduces the throw of most grip positions to prevent the forward lean that some smaller users may experience. This also keeps the wrists in a more neutral position throughout the entire range of motion.

The **X1400** Elliptical Trainer has a compact 57" x 26" footprint.

# elliptical trainer console features

most Vision Fitness® consoles have the following key features:

Vision Fitness's line of elliptical trainers boasts a modern console design. The example shown here is of the X6200HRT.

Large 8x16 Dot Matrix Profile Display graphically illustrates your workout and where you are in your workout.

Innovative Programs, such as SPRINT 8, and the four Heart Rate Training (HRT®) programs keep you motivated and progressing toward your goals. Each program has its own button for easy setup and for easy program changes "on the fly."

Integrated Reading Rack conveniently holds magazines for you to read as you exercise.

Up & Down Arrow Keys allow you to easily adjust the intensity level of your workout at any time.

HRT® Feedback Display shows actual Heart Rate, Percent of your Maximum Heart Rate, and your Target Heart Rate.

LED Feedback Display shows eight types of feedback information.

## The Perfect Fitness Solution ...

The SPRINT 8® program found on Vision Fitness® elliptical trainers was developed with Phil Campbell, MS, MA, and author of *Ready, Set, Go! Synergy Fitness*. Mr. Campbell is an expert in the field of anaerobic exercise, which has been cited by numerous medical publications as the cure for somatopause or the "middle-age spread." The "middle-age spread" is the energy decline, weight-gain, loss of muscle, and wrinkled skin we experience after age 30.

Vision Fitness is the first fitness company to integrate anaerobic exercise programming (SPRINT 8) into our equipment that specifically promotes the natural release of human growth hormone. This hormone—the most powerful body-fat-cutting, muscle-toning, anti-aging substance known in science—is produced by the body during the SPRINT 8® workout.

# | the heart of a great workout ...

Vision Fitness® elliptical trainers offer a long list of features that make your workout experience smooth, quiet, and comfortable.

Here are some key features you'll find on most of our models:

feature	benefit
<b>contact heart rate grips</b>	These grips allow you to quickly monitor your heart rate during your workout.
<b>motivational programming</b>	We offer a variety of easy-to-use programs to keep you engaged.
<b>large, cushioned footplates</b>	The 5 ½" x 14" area gives plenty of space, cushioning, and traction for a safe and comfortable workout.
<b>patented folding feature</b>	You can fold our <b>X6100</b> and <b>X6200HRT</b> models to a compact 42" x 27" footprint.
<b>extra-wide Poly-V belts</b>	You get a smooth and quiet ride, and your elliptical trainer enjoys a longer life.
<b>heavyweight flywheels</b>	These flywheels are properly weighted to provide smooth and consistent resistance for a more comfortable workout experience.
<b>magnetic resistance system</b>	Our ECB-Plus™ system creates smooth, accurate resistance changes. No jerking or uneven motion!
<b>heavy gauge steel frames</b>	Heavier frames provide more stability during your workout.
<b>ISO certification</b>	The highest quality standards were achieved in developing our elliptical trainers.
